DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group II, drawn to claims 14-26, in the reply filed on 05/22/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 1-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 05/22/06.
3. The examiner notes the unintentional omission in the Detailed Action mailed 05/03/06 of the election of species requirement as follows:
4. This application contains claims directed to the following patentably distinct species of calculating a parameter, α , representing an intracellular/extracellular fluid ratio, comprising:
 - Species A: $\alpha = 1 / \Phi$ embodiment drawn to claim 19,
 - Species B: $\alpha = 1 / \tan(\Phi)$ embodiment drawn to claim 20,
 - Species C: $\alpha = R / X$ embodiment drawn to claim 21,
 - Species D: $\alpha = P_{\text{high}} / P_{\text{low}}$ embodiment drawn to claim 22,
 - Species E: $\alpha = P_{\text{low}} / (P_{\text{low}} - P_{\text{high}})$ embodiment drawn to claim 23,
 - Species F: $\alpha = P_{\text{high}} / (P_{\text{high}} - P_{\text{low}})$ embodiment drawn to claim 24,
 - Species G: $\alpha = R_{\text{int}} / R_0$ embodiment drawn to claim 25, and
 - Species H: $\alpha = R_i / R_e$ embodiment drawn to claim 26.

Art Unit: 3736

5. The species are independent or distinct because they are substantially divergent and dissimilar means for correcting a bioelectrical impedance value.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. A telephone call was made to Michael Messina on 04/26/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
